Bom jogo pra passar o tempo!. No. just no.. For an Early Access game, Doorways seems to be done very well. I can't wait for them to release the other acts to follow after this one of course. It's more of a psychological horror because it puts things in places that aren't really there as per typical psychological horror games. The lighting plays a big part in this game and seems to be done very well in using it.. I really liked the first two parts in the Doorways series and this one is no exception. Some say the in-game graphics look a bit dated, but they sure do trick for me. Personally, I think it's an amazing art style throughout the whole series. It's pretty disturbing and so are the background stories and the creepy sounds you'll hear from time to time when

discovering new areas. This one tops it on all levels. One downside of the previous two parts was that the puzzles were a bit too easy. This one delivers more. Especially in the part called 'The Mansion' which is also amazingly beautiful. I do wonder about the mental state of the developers though. the last part is.. headache/10. Just ran into this and bought without much think. Thoroughly enjoying it. Has a strange old school charm about it with an environment unique unto itself. Sufficiently creepy. Having a real damn good time. I'd recommend this in a second. Not a lot of fantastic games being made these days. Go for it.. got it for free .creepy.. The last chapter from the previous 2 games, this is more disturbing and has more difficult puzzles than the previous 2 games. Involving jumpscare as well, but I noticed it also lack the same feeling from Underworld where you would feel at any moment you would get chased by a creature. But still, there are still some chase scenes and the disturbance throughout the game really makes it even more horrifying. It also really goes from what the title of this game is saying too.
